And with the power of your Sega CD™ system paired with state-of-the-art digital audio and video, plus the colorful superstars of the World Wrestling Federation®, the result is pure wrestling action that never lets up.

There's the opening bell! Get out there and wrestle!

BEFORE YOU CLIMB INTO THE RING

LOADING:

1. Set up your Sega CD™ as described in its manual.
2. Turn the power on your Sega Genesis™ ON. When the Sega CD™ opens, place your **W[®] RAGE IN THE CAGE™** CD onto the tray and press the START BUTTON.
3. When you see the **W[®] RAGE IN THE CAGE™** title sequence, press the START BUTTON on your controller to bring up the selection screens.

NOTE: **W[®] RAGE IN THE CAGE™** automatically supports the Sega™ Genesis™ 6-Button Arcade Pad. Use the UP and DOWN D-BUTTON ARROWS and the C BUTTON to choose your match type. Choose either one or two players in:

- ONE FALL
- BRAWL
- TOURNAMENT
- STEEL CAGE MATCH

Then, if you are playing a one-player game, you will be asked to select the difficulty level you desire from 1 (easiest) to 10 (hardest) and finally, to select whether you want to have the computer select your opponent or select for yourself.

Once the options have been selected, you will then be able to choose which World Wrestling Federation® superstars you wish to control. The D-BUTTON scrolls between them, the A BUTTON bring up videos of their special moves and the C BUTTON selects them.

At any time before the actual start of the match, you may go back and change any of the above elements by pressing the START BUTTON.

NOTE: If you are using a controller with a slow-motion feature, be sure to turn the slow-motion feature OFF when playing **W[®] RAGE IN THE CAGE™**.

RULES OF THE RING

W[®] RAGE IN THE CAGE™ provides a wide variety of ways to wrestle, ranging from the standard one-on-one, one-fall match to the brutal **W[®] RAGE IN THE CAGE™**, each with its own rules, regulations and goals. A one-on-one **One-Fall** match pits two wrestlers against one another. The object of this match is to pin your opponent for a three-count administered by the referee. Because wrestlers are in peak physical condition, this can often be hard to do. Before they can be pinned, they must be worn out. Accordingly, a strength meter is displayed on-screen for each wrestler, depicting exactly how much strength he has left. The lower his energy level, the more likely it is that you will be able to pin him.

STRENGTH
METER

STRENGTH
METER

A **Brawl** is a match without a referee. Anything goes. All illegal moves are permitted, and there are no pins or disqualifications! The match goes on until one man lacks the strength to continue!

In **Tournament** mode (available only when playing the computer), your wrestler must score victories against all 19 other wrestlers in order to win the coveted World Wrestling Federation® Championship Belt. The selection of opposing wrestlers and the order in which you face them is random.

The **Steel Cage Match** is the ultimate test of a wrestler's skill and endurance. Two wrestlers are locked inside a steel cage from which only one can emerge. The victor is whoever climbs over the top of the Cage first! But getting there won't be easy, because all moves, including illegal ones, are permitted inside the Cage!

MOVES AND MANEUVERS

Before you can win the World Wrestling Federation® Title, you must learn the art of wrestling from the ground up. Once the basic ground moves and grapples have been mastered, you can perfect the difficult aerial moves and eventually the special, unique moves of each wrestler. Only when all these have become second nature can you begin your quest of the World Wrestling Federation's® most coveted honor in earnest.

NOTE: 6- Button Controls are in parentheses.

ground moves

To move around the ring, use the D-BUTTON ARROWS.

To run across the ring, hold the A BUTTON.

To kick your opponent, press the C BUTTON while you and your opponent are both standing.

To punch your opponent, press the B BUTTON while you and your opponent are both standing.

To stomp or kneedrop your opponent, press the C BUTTON while you are standing and your opponent is on the mat.

To splash or elbowdrop your opponent, press the B BUTTON while you are standing and your opponent is on the mat.

Go for the pin by pressing the B+C BUTTONS (Y BUTTON) while you are standing and your opponent is lying on the mat. Press the A+B BUTTONS (X or Z BUTTON) to roll off your opponent and continue wrestling, or press any other button (A, B or C BUTTON) to keep your opponent pinned. If you pin your opponent for a full three-count, you win!

When on the mat, press any button to get up or, if being pinned, to try to kick out of the pin attempt.

To roll out of the way of your opponent when you are on the mat, use the UP and DOWN D-BUTTON ARROWS.

To exit the ring during a cage match, hold the A+B BUTTONS (Z BUTTON) and push the D-BUTTON into the upper-left or upper-right corner.

MOVES AND MANEUVERS

One of the most important and exciting events in a wrestling match is the **grapple**. The grapple is the essence of wrestling, as the two combatants vie for control against each other, using all of their strength and speed to force their opponent into submission.

To lock your opponent in a grapple, press the B+C BUTTONS (Y BUTTON) while you are both standing. The wrestler who is leaning forward during the grapple is the man in control of his opponent. When grappled, a grapple meter will appear over the wrestlers, indicating the direction and degree of control. When dominating in the grapple, you have several options, each of which requires a certain degree of dominance to achieve.

1: Deliver a **headbutt** by pressing the C BUTTON.

2: **Bodyslam your opponent** by pressing the B BUTTON.

3: **Suplex your opponent** by pressing the B+C BUTTONS (Y BUTTON).

4: **Push your opponent** into the ropes by pressing the A BUTTON.

5: Deliver a **backbreaker** by pressing the A+B BUTTONS (X BUTTON).

6: Deliver an **atomic drop** by pressing the A+B+C BUTTONS (Z BUTTON).

To fight for dominance in a grapple, hit any button repeatedly. If you are being controlled in a grapple, the A BUTTON will enable you to break out of the grapple... if you have enough strength.

MOVES AND MANEUVERS

Aerial moves are another exciting element of a professional wrestler's repertoire. They are much more difficult to master than simple kicks and punches but are well worth learning because they are some of the most effective and punishing maneuvers in the sport.

To hip-toss your opponent, press the B BUTTON while you are standing and your opponent is running.

To deliver a dropkick, press the C BUTTON while you are standing and your opponent is running at you, or press the B BUTTON while you are running and your opponent is standing.

To clothesline your opponent, press the B + C BUTTONS (Y BUTTON) while you are standing and your opponent is running.

To deliver a flying elbowdrop, press the B BUTTON while you are running and your opponent is lying on the mat.

To climb to the top turnbuckle, use the D-BUTTON ARROWS to walk to the upper left or right corner of the ring, then press the UP D-BUTTON ARROW to climb up.

To leap off the turnbuckle, press the A, B, or C BUTTON (Y BUTTON.)

To climb back down, press the DOWN D-BUTTON ARROW.

Sometimes the sheer force of a wrestling move will send a wrestler spilling from the ring onto the concrete surrounding it. As soon as the referee sees you have left the ring in a one-fall match, the referee will begin a 10-count.

If, when he reaches 10 you are not in the ring, you will be disqualified and your opponent will be awarded the match.

To return to the ring, walk into the apron of the ring.

MOVES AND MANEUVERS

r u l e - b r e a k e r s o n l y

If you're an honest scientific wrestler who sticks to the rules and enjoys honest competition, please skip this section. But if you're the kind of wrestler who seeks any advantage, without regard for the rules or for the safety of your opponents, read on. There are moves that have been banned in standard

World Wrestling Federation® matches because of their injurious effects on their victims. These illegal moves can be used in the ring during the refereeless Brawl and Steel Cage matches, but a referee will always prevent you from using them when he's watching! These moves are the eye gouge and the chokehold.

To choke your opponent, press the A+B BUTTONS (Z BUTTON).

To gouge your opponent's eyes, press the A+B+C BUTTONS (X BUTTON).

MOVES AND MANEUVERS

To break a chokehold, press ANY BUTTON repeatedly when being choked.

Leaving the ring voluntarily during a match is also illegal, but it can be a useful strategy, because all moves, including illegal ones, can be used outside the ring. Once a match leaves the ring, the referee has no authority over it except to begin the 10-counts against the wrestlers. Preventing your opponent from returning to the ring during his count is often an easy path to victory!

To leave the ring voluntarily, press the A BUTTON while walking into the ropes on the front or sides of the ring, or by rolling to the front and pressing the A BUTTON.

s p e c i a l m o v e s

Each wrestler in the World Wrestling Federation® demonstrates his own unique style and personality. These personalities influence everything from outfits to wrestling strategies, but where these personalities are often best reflected is in the special "signature" moves that each wrestler perfects. From Shawn Michaels™ "Back Suplex" to Bret Hart's™ "Sharpshooter," each wrestler's special move is like a trademark, identifying him to the wrestling world while inspiring fear and respect from his opponents! Master each wrestler's special move for the ultimate World Wrestling Federation® matches! Each can be used only when inside the ring, only when your opponent is worn down, and only in specific situations. See the Special Moves chart on pages 13-14 for more details.

STRATEGIES TO REMEMBER

- Keep an eye on your strength meter.
- Work on combinations: That is, follow up one move very quickly with another move. This way, you don't give your opponent a chance to catch his breath... or you off-guard!
- Wait for the appropriate time to launch an aerial attack: You want your opponent weakened enough so that he doesn't roll out of the way and gain an advantage while you're down!
